

WiFi NETWORK CONTINUITY

Smarter, Simpler WiFi

Datto Networking WiFi access points enable powerful, easy-to-use wireless networks with seamless roaming, for always connected WiFi. The bundled cloud management setup and configuration streamlines wireless network deployments with minimal effort. Smarter, simpler WiFi means better performance, less maintenance and a better user experience.

Cloud Management

Datto Networking WiFi includes a full-featured, cloud management system to build, manage and monitor the network from any browser. Accessed from the same Datto Portal used to manage all of Datto's devices, Datto's cloud management delivers greater visibility and integration between systems, faster network deployment and simpler network configurations.

High-Performance WiFi

Access points deliver enterprise-grade WiFi featuring dual band simultaneous 2.4GHz/5GHz, up to 3x3 configurations on wireless N or AC, Gigabit Ethernet, standard 802.3af PoE and more. That's a bunch of technical jargon that means fast WiFi.

Self-Organizing Networks

Datto Networking's access points self-organize, enabling seamless roaming WiFi across the network. And, because you can monitor your entire network from the cloud management system, you can drill down to each switch or access point to debug any issues. Smarter networking means fewer truck rolls to fix problems. That saves money.

Self-Healing Mesh

All of Datto Networking WiFi access points are mesh enabled and get their power from PoE+ (802.3af/at). Access points work together to form a self-organizing, self-healing, encrypted mesh network with seamless WiFi roaming automatically enabled... No more dead spots. Mesh enables deployment flexibility in locations where additional cabling isn't always feasible. WiFi continuity, wherever it's needed.

Datto Networking WiFi

	DNW-AP40	DNW-AP60
Speed (rated)	300+867 Mbps	450+1300 Mbps
Band	2.4 + 5 GHz 802.11ac concurrent	
Antenna	Four internal	Six internal
Range (approximate)	75' - 150' indoor (3-4 walls) 400' - 600' outdoor	
Max users (recommended)	30-60 per AP	50-100 per AP
WLAN standard	802.11a/g/n/ac	
Memory	128MB DRAM	
USB	Yes	
Zero config plug and play	Yes	
Self-forming, self-healing Mesh	Yes	
Seamless roaming	Yes	
Hardware watchdog CPU	Yes	
Cloud Management	Yes	
SSIDs	4	
SSID to VLAN tagging	Yes	
Public & Private SSIDs	Yes	
Ethernet (WAN and LAN)	2 x Gigabit	
PoE	Standard 802.3af	
Certifications	FCC (US), IC (Canada), RCM (Australia, New Zealand)	
Size	6.69" x 6.69" x 1.2"	
Warranty	3 years	

Warranty & Support

At Datto, we believe in the value of great products and an unwavering commitment to 24x7x365 customer service and support. Every Datto Networking product ships with a three-year warranty...backed by our replacement program. If you have an issue with your device, we ship you a new one before you send your damaged device back. That way users are always connected. Powerful networks, the Datto way.
